# Performance Report

This report is available by clicking under the Servers tab --> Performance on the Server Genius web interface.

It displays the following data:

- **CPU usage** (in percentage of the total available CPU power)
- **Memory usage** (in percentage of the total available RAM memory)
- **I/O** (in percentage of the total available disk time)

The date-range can be customized by using the date-range picker at the top right of the web page.
