

# Settings

You can manage ServerGenius settings by clicking under the Administration tab > Settings:

The screenshot shows the 'Administration' section of the ServerGenius web interface. The 'Settings' option in the right-hand navigation menu is highlighted. The main content area is divided into three sections: 'General Settings', 'Authentication Settings', and 'Emails Settings'. Under 'General Settings', there are fields for 'Version' (3.4.0.0), 'Port' (7777), and 'Language' (English). Under 'Authentication Settings', there are fields for 'Administrator Username' (admin) and 'Administrator Password' (masked). Under 'Emails Settings', there are fields for 'SMTP Hostname' (terminalserviceplus.co), 'SMTP Port' (25), 'SMTP Username' (alerts@terminalserviceplus.co), 'SMTP Password' (masked), and 'Send Email As' (watchers@terminalserviceplus.co). A 'Validate Saved Email Settings' link is present below the email settings fields, and a 'Save' button is at the bottom.

- Under the General Settings, you can see your Server Genius current version and the port you set up during [installation](#) and setup your preferred language.
- Under the Authentication settings, you can modify the Administrator username and password (Which is by default **admin - admin**).
- Under the Email settings, you can set the SMTP Hostname, Port, Username, Password and even set the Email address you will receive the Alerts from.

Since Server Genius 3.4 version, an Email Settings Validation has been added and enables you to test and validate your SMTP server settings. Click on the Validate Saved Email Settings line, then send an email to the recipient of your choice:

The screenshot shows the 'Email Settings Validation' page. It features a text input field for the recipient's email address, preceded by the text 'Validate Email settings by sending an email to the following recipient'. A 'Send' button is located below the input field.
