

Administration Tool Overview

After [installing Remote Work](#), your server is immediately ready to go.

However, you can **customize all the system parameters** with a powerful Administrator Tool.

To do so, click on the following icon created on your Desktop:

The Administrator Tool will then be displayed:

The Administration Tool must be installed on your PC Connection Broker.

It allows you to configure all of the office workstations.

Want to get help on a feature of TSplus Remote Work Admin Tool quickly?

Just **click on a file or on a tab** to go to the matching help!
