

Installation

Run the Server Monitoring Setup program and then **follow the installation steps**.

Note: Windows will prompt you to run the setup as Administrator.

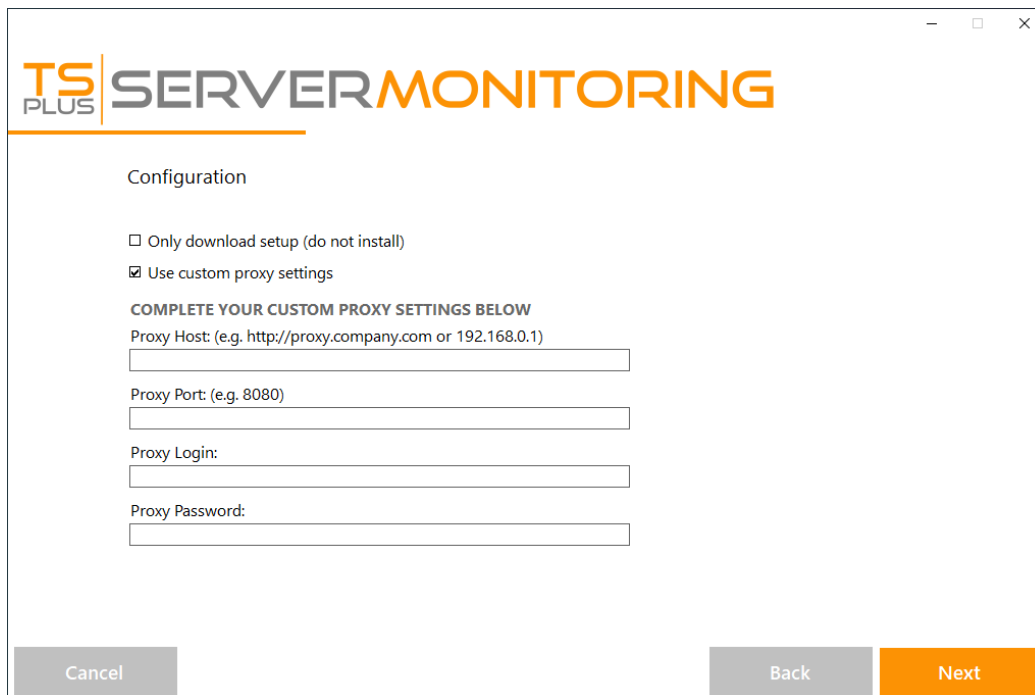

Click on "Next".

Choose if you want the recommended install, or the advanced install.

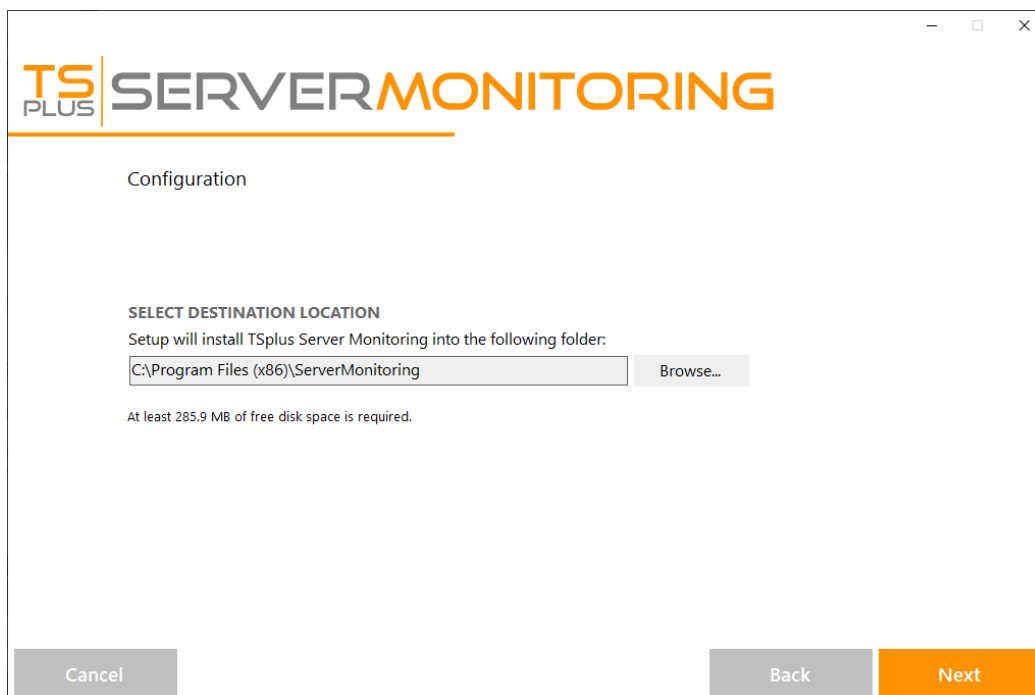

If you choose the advanced install, you will have a few extra configuration options:

The screenshot shows the 'Configuration' window of the TS PLUS SERVER MONITORING installer. It features the product logo at the top left. Below the title, there are two checkboxes: 'Only download setup (do not install)' which is unchecked, and 'Use custom proxy settings' which is checked. Under the heading 'COMPLETE YOUR CUSTOM PROXY SETTINGS BELOW', there are four input fields: 'Proxy Host: (e.g. http://proxy.company.com or 192.168.0.1)', 'Proxy Port: (e.g. 8080)', 'Proxy Login:', and 'Proxy Password:'. At the bottom of the window, there are three buttons: 'Cancel', 'Back', and 'Next'.

The Advanced option allows you to:

- Use custom proxy settings.
- Download the installer without running it, which does not install Server Monitoring.

The screenshot shows the 'Configuration' window of the TS PLUS SERVER MONITORING installer, specifically the 'SELECT DESTINATION LOCATION' section. It displays the text 'Setup will install TSplus Server Monitoring into the following folder:' followed by a text box containing 'C:\Program Files (x86)\ServerMonitoring' and a 'Browse...' button. Below this, a note states 'At least 285.9 MB of free disk space is required.' At the bottom of the window, there are three buttons: 'Cancel', 'Back', and 'Next'.

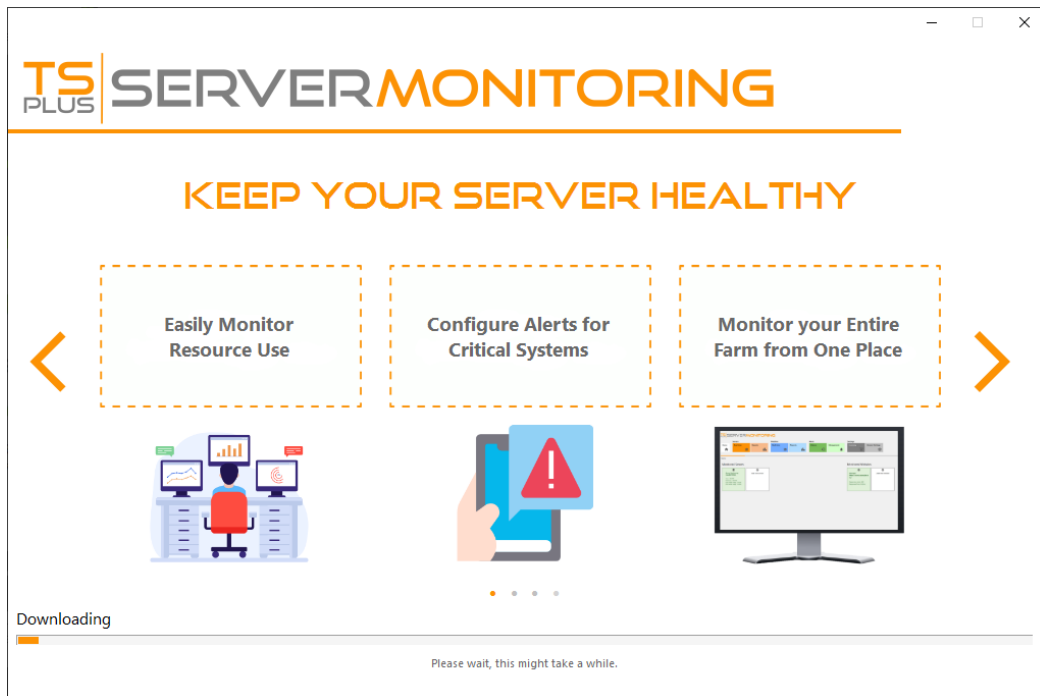

You can choose to install Server Monitoring in a custom location.

The screenshot shows the 'Database Configuration' window of the TS PLUS SERVER MONITORING application. The window has a title bar with standard Windows controls. The main content area is titled 'Database Configuration' and contains two radio buttons: 'Use the default SQL Server instance' and 'Configure an existing database'. The second option is selected. Below this, a section titled 'ENTER YOUR CUSTOM DATABASE SETTINGS BELOW' contains several input fields: 'Instance Name' (with '.\SQLEXPRESS' entered), 'Database Name' (with 'ServerMonitoring' entered), 'Login Type' (a dropdown menu showing 'Windows Authentication'), 'Username (optional for Windows authentication)', and 'Password (optional for Windows authentication)'. At the bottom, there are three buttons: 'Cancel', 'Back', and 'Next'.

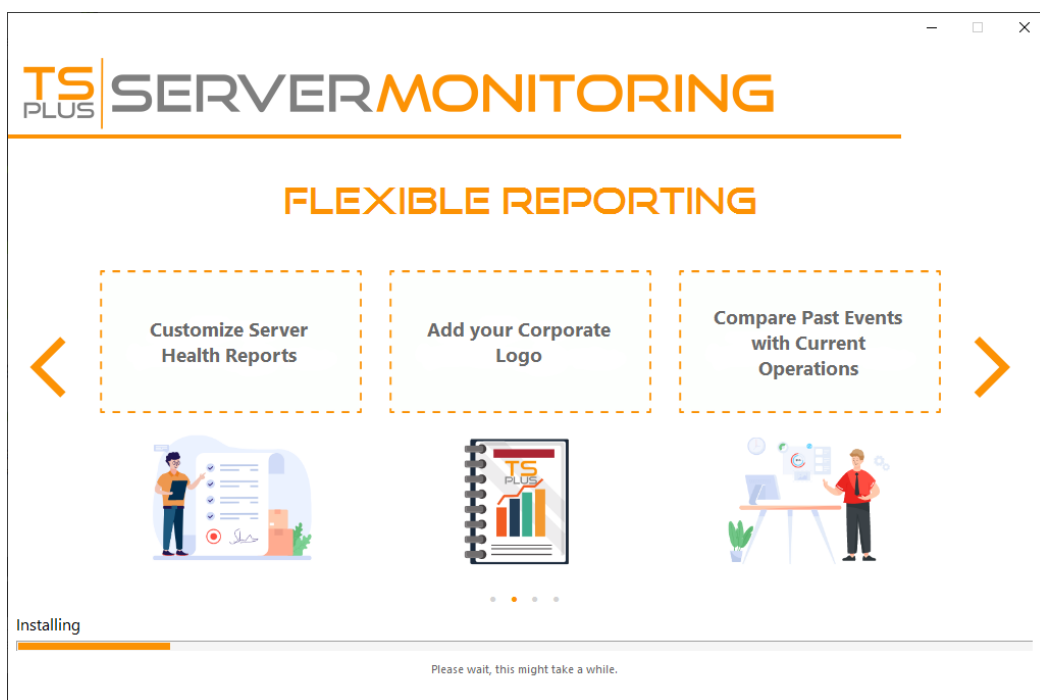

Server Monitoring uses a SQL Server database to store all the data coming from your monitored servers. You can use the default SQL Server Instance, or choose another instance if you already have SQL Server installed.

The screenshot shows the 'License Agreement' window of the TS PLUS SERVER MONITORING application. The window has a title bar with standard Windows controls. The main content area is titled 'License Agreement' and contains a scrollable text box with the following text: 'TSplus ServerMonitoring license agreement', 'Software', 'You should carefully read the following terms and conditions before opening the software package, or if downloaded, before using such downloaded software. Opening the package or using the software, if downloaded, means you accept these terms and conditions and understand that they will be legally binding on you and TSplus ServerMonitoring. If you do not agree with these terms and conditions, or do not want them to be binding on you, you should promptly return the package unopened for a full refund or delete the downloaded software from any storage medium that it is stored on.', 'Ownership', 'You acknowledge and agree that TSplus ServerMonitoring ("licensor") is the owner of all rights, title and interest in and to the enclosed disks and/or cdrom and/or the downloaded TSplus ServerMonitoring software, if downloaded, and the computer programs contained therein in machine readable object code form as well as the accompanying user documentation along with all subsequent copies thereof, regardless of the media or form in which they may exist (collectively the "software"). The software is protected by copyright laws and international treaty provisions, and this license agreement does not convey to you any interest in or to the software, digital content, or any accompanying printed materials, but only a limited right of use and limited reproduction which is revocable in accordance with the terms of this license agreement.', 'License', 'Grant of license.', 'Licensor hereby grants and you accept a nonexclusive license to use the software in accordance with the terms of this agreement.', 'Remote Desktop/Remote Assistance.', 'The Software contains Remote Desktop and Remote Assistance technologies that enable the Software or applications installed on the TSplus ServerMonitoring Computer (hereafter referred to as a Host Device) to be accessed remotely from other Devices. You may use the Software's Remote Desktop feature to access the Host Device from any Device provided you acquire a separate Software license for that Device (for example, you may use any Windows XP based laptop to remotely access one TSplus ServerMonitoring Host Device). When you are using Remote Assistance (or other software which provides similar functionality for a similar purpose) you may share a Session with other users without any limit on the number of Device connections and without acquiring additional licenses for the Software. For Microsoft and non-Microsoft applications, you should consult'. At the bottom, there are three buttons: 'Cancel', 'Back', and 'I agree'.

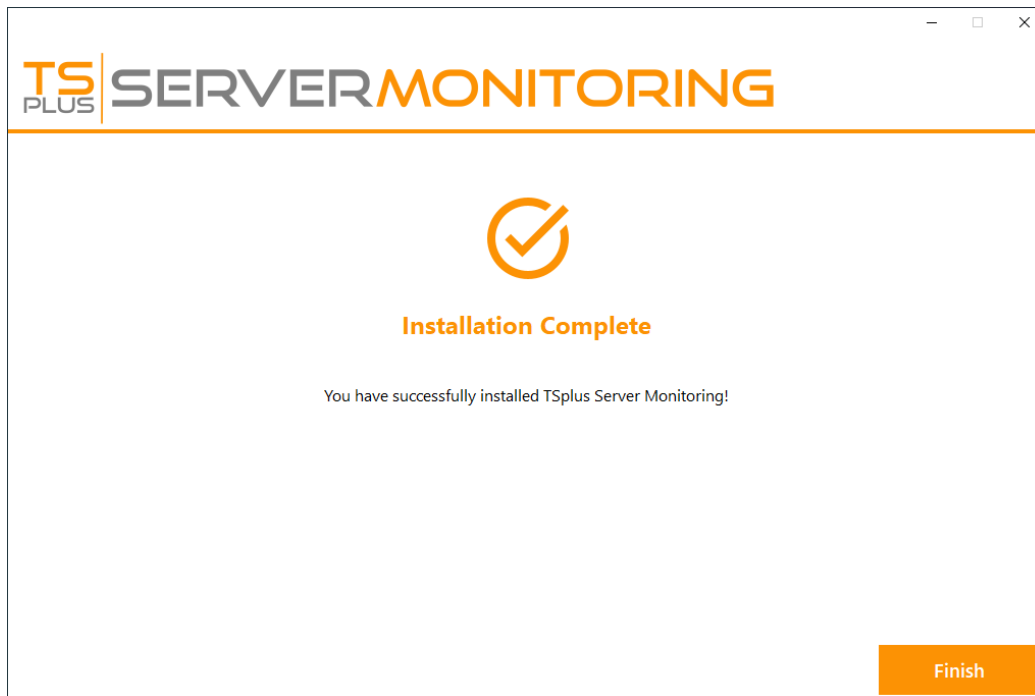

Please click on "I agree" to accept the license agreement.

The setup will now download all the prerequisites

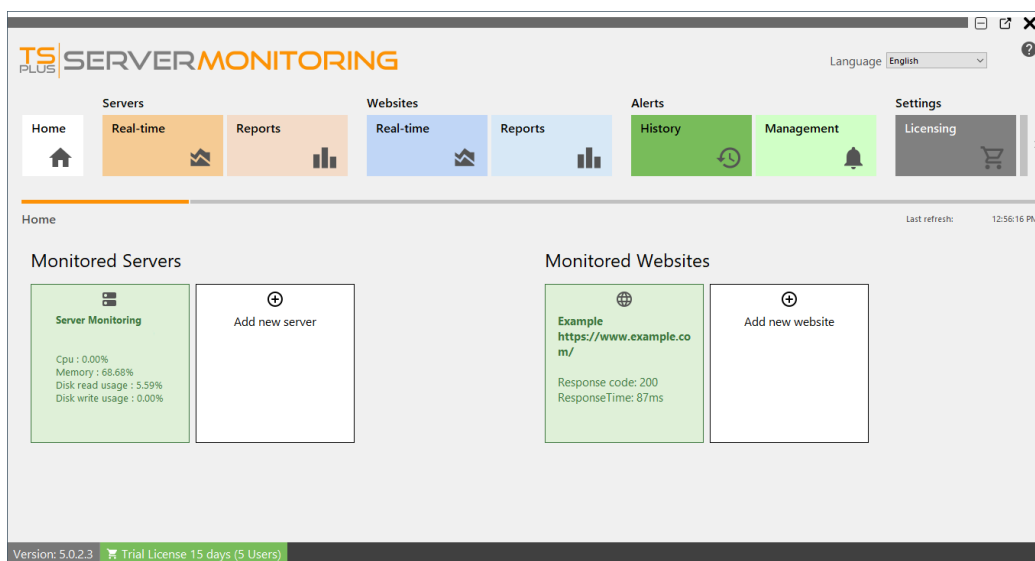

Please be patient - It can take a few minutes to fully install the software and its prerequisites.

NOTE: You may be required to restart your computer before using Server Monitoring.

You can now open Server Monitoring by clicking on the shortcut created on your desktop.
You will be greeted by the home screen of the Administration Console:

The free trial of Server Monitoring is a fully featured 15 day license.
