Web Credentials

Overview

Terminal Service Plus Web Credentials is a state-of-the-art unique feature, which allows users to connect with just an email address or a pin-code.

With Web Credentials, you can secure your server's access with the e-mail address of a user, or with a simple pin-code generated by your business application. One of the great benefits of this feature is that these credentials (e-mail or pin-code) are pure web credentials : the user will not know the Windows user account he is currently using, and he does not need to know a real Windows login/password to connect to his application!

With Web Credentials, you will be able to define custom pure web credentials and match them to any existing Windows / Active Directory user account. The user will then be able to connect using these custom credentials, instead of the Windows / Active Directory ones.

Managing your Web Credentials

In the Admin Tool, open the "Web" tab and click on the "Web Credentials" tile.

tsplus - Administration Console				- 🗆	×
	ACCESS		Help	English	ode •
Ф номе	Web Portal				
	P Web Portal Design	😌 Web Credentials			
	Web Portal Preferences	RemoteApp Client			
S WEB	Applications Portal	HTML5 Client			
FARM	tsplus Web App	R HTML5 Top Menu			
SESSIONS					
SYSTEM TOOLS	😯 нттрз				
😥 advanced	Web Server				
값 ADD-ONS	• Lockout				
ତିଙ୍ଗ LICENSE					

The Web Credentials Manager will open and display this window:

🐺 Web Credentials				_	×		
Manage Web Users and Match them to Windows / Active Directory Users							
Web Login	Windows Login		2+ Add a new Web Credential				
			💒 Edi	t Web Credential			
			<mark>2</mark> - Rei	move Web Credential			
Web Access Page							
Enable Web Credentials							
Allow empty Password							
Show the Password field Mask Username field		Preview	w	Save			

You can now create a new Web Credential by matching a custom login and (optional) password with an existing Windows / Active Directory user account, as shown below:

🗳 Add a new Web Credential 🛛 🕹 🗙			
Web Login:	Edgar		
Web Password: (optional)			
	will match:		
Windows Login:	Edgar		
Windows Password:	•••••		
Maximum number of concurrent session: 3			
	Save Cancel		

Since TSplus 9.50 version, you can also decide the maximum number of concurrent sessions for a user.

You can also edit and remove an existing Web Credential, thus changing or disabling any custom credentials you configured.

Alternatively, you can create web credentials via a command line:

- On the Windows Start Menu, on the execute field, type in: 'cmd.exe' (or in Programs/Acc

- Then, in order to go to the right folder, type: cd "C:\Program Files (x86)\TSplus\UserI

validate

- To add a new Web Credential, type: AdminTool.exe /webcredentials-add your_web_login you

- To add a blank credential, type two double quotes: "" to indicate a blank text.

- To delete a web credential, type: AdminTool.exe /webcredentials-remove your_web_login

(if you like using command lines and are wondering what other command lines are available, please go to this <u>specific</u> <u>documentation</u>)

Important Notes

Please note the following limitations:

- '[', ']' and '°' characters are not supported on the password fields.
- In a Farm / Gateway configuration, Web Credentials only support the <u>load-balancing mode</u> (it does not work with server-assigned mode).
- In a Farm / Gateway configuration with load-balancing mode, the Web Credentials must be defined on every server of the farm at the moment.
- 2FA is not compatible with the Web Credentials feature.
